Dear Mr. & Mrs. Cottrell:

Re: Water Right Application No. G2-29766

We have received your application for appropriation of water and it has been assigned the number referenced above. If you contact us in the future regarding this application, it will help us serve you more quickly if you refer to this application number.

Please complete the following two steps:

1. Enclosed is a notice of your application, which must be published once a week for two consecutive weeks in a newspaper published in **Pacific County**. The newspaper should have general circulation in the locality where the water is to be diverted and used, and must be qualified as a legal newspaper. Publishing the notice in a remote part of the county, when not necessary, may be cause for you to be required to republish the notice in a designated newspaper. The enclosed newspaper list may help you select an appropriate newspaper for the area.

Publication should start within 30 days from the date of this letter.

To assure accuracy, it is your responsibility to check the notice carefully before having it published. If you find an error, please contact this office for correction and/or resolution. If we later find an error in your public notice, you will be required to re-publish an amended notice at your expense.

2. After publication, the publishing newspaper should provide you with a notarized original Affidavit of Publication, which should be forwarded to our office as soon as possible. Please do not send a photocopy of the affidavit.

If you have any questions or concerns about any of this information, please call (360) 407-0240. Thank you for your attention to this matter.

Sincerely,

Sheri Carroll
Water Resources Program

NOTICE OF APPLICATION TO APPROPRIATE PUBLIC WATERS

TAKE NOTICE:

That Walter & Christine Cottrell of Grayland, Washington on August 12, 1998 under Application No. G2-29766 filed for permit to appropriate public waters, subject to existing rights, from a sump in the amount of 450 gallons per minute as needed each year, for irrigation during the irrigation season and heat/frost protection. The source of the proposed appropriation is located within NE1/4SW1/4, Section 29, Township 15 N., Range 11 W.W.M., in Pacific County.

Protests or objections to approval of this application must include a detailed statement of the basis for objections; protests must be accompanied by a two dollar (\$2.00) recording fee and filed with the Department of Ecology, at the address shown below, within thirty (30) days from: _____ (Last date of publication to be entered above by publisher)

* NOTICE MUST BE PUBLISHED ONCE A WEEK FOR TWO CONSECUTIVE WEEKS *

Dear Water Right Applicant:

Re: Water Right Application No. G2-29766

This letter is to acknowledge that the Washington State Department of Ecology received your water right application. We have assigned your application the number indicated above. Please include this number in future correspondence regarding your application with the Department of Ecology.

When we begin actively evaluating applications in your area, we will prepare a public notice and send it to you with publication instructions. It will be sometime before we are able to begin working in your area. In the meantime, please notify Ecology of changes such as address, property ownership, or variations in your proposed water use plans.

The availability of water in Washington state is a serious problem. Much of the water in our state has already been appropriated. The competition for water has escalated with our state's increasing population, conflicting water policy issues, and grave declines in salmon and other fish populations. A new watershed management law brings us a step closer to addressing some of these issues. It sets into motion a locally based process to address water quantity, quality, and habitat issues. Watershed management will help meet challenges for getting water to people, industries, farms, and fish.

In some areas of the state, we are continuing to evaluate applications within watersheds where we have previously gathered information and completed watershed assessments. We are also continuing to process water right permit or change applications that are intended to address public health and safety emergencies, the natural environment, or are for nonconsumptive withdrawals. All other applications are grouped by watershed and processed according to the date of submittal, and when we have enough information and staff resources to make decisions.

If you would like further information on your application, please contact the Southwest Regional Office at (360) 407-0240.

Sincerely,

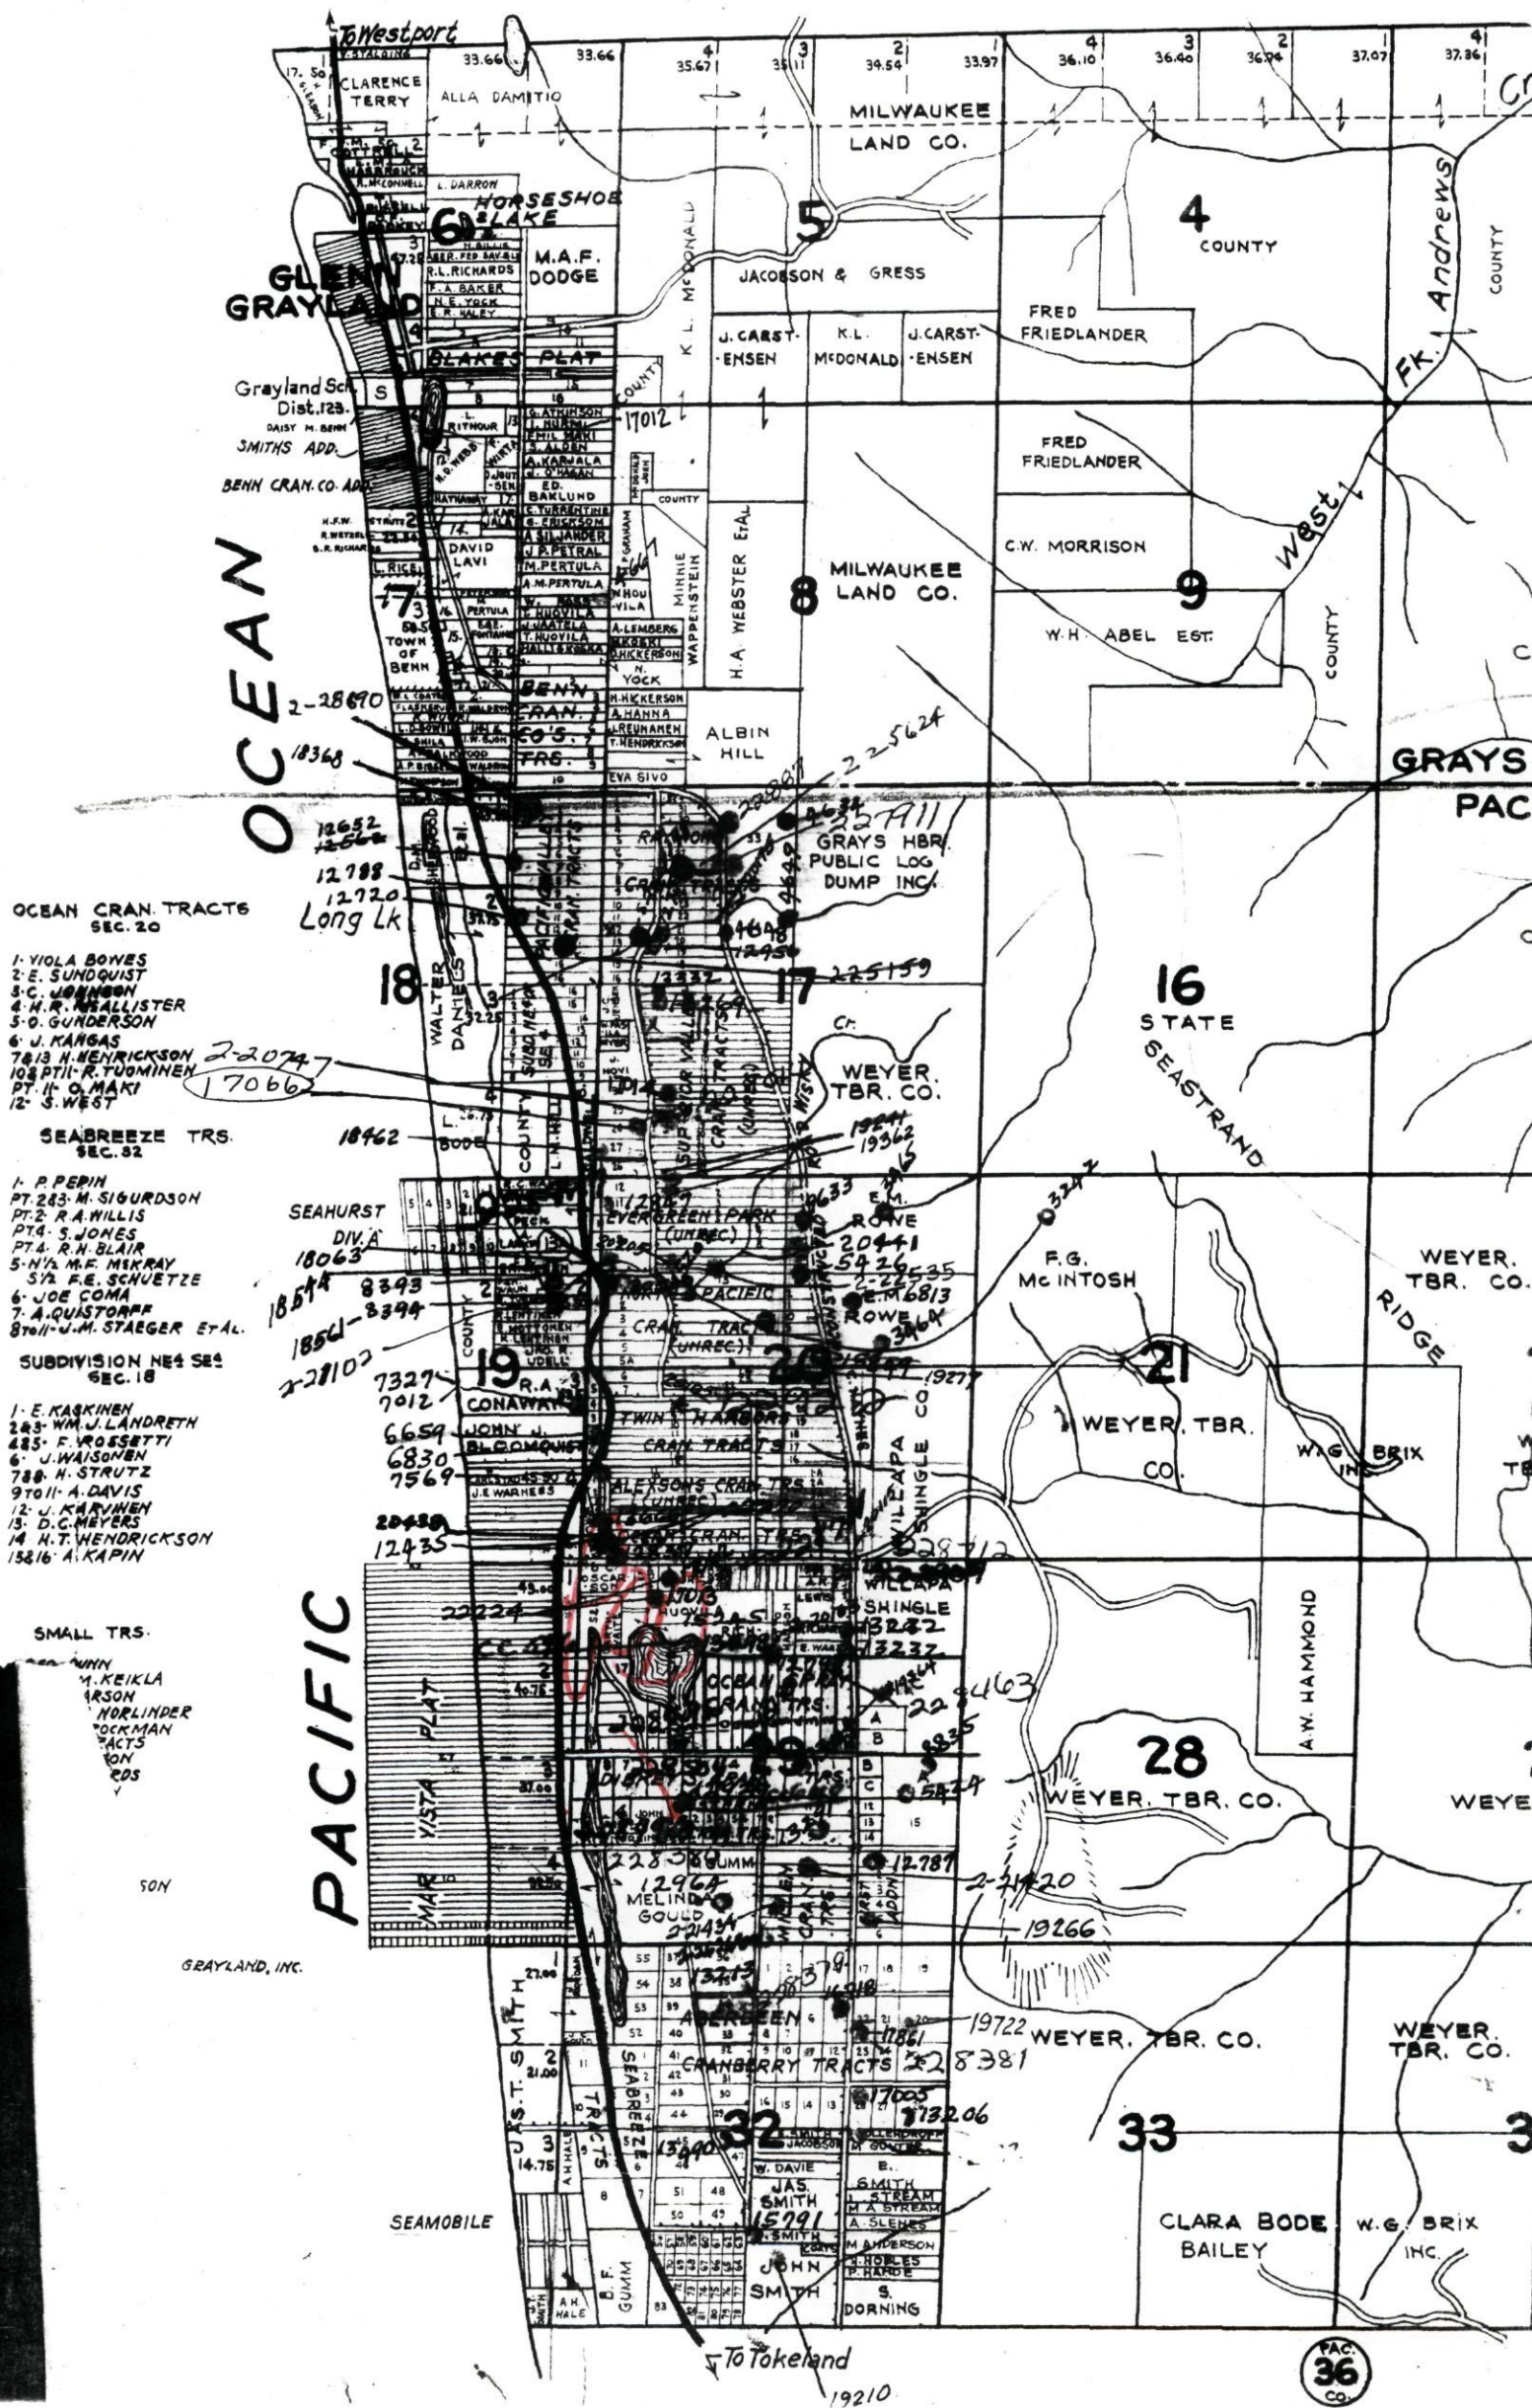

J. Mike Harris

GRAYS HARBOR**

Dear Mr Davidson,

My hope is to make sure
our water rights and usage
are legal.

I have drawn one map
showing all three properties as
they are all in Section 29.

If possible, it would be
nice to have all the rights in our
name.

In each case we have
expanded the land which we are
covering with our irrigation system,
either by planting more bog or
acquiring adjacent land or both.

Looking at our deeds, I
discovered we had water rights
on the sump hole on Wilcox tract 2
which was not discovered in

the search in your office, so
I have enclosed a copy from
Pacific County records.

Thanks to all of you who
have answered my phone calls
and mailed me information!

Sincerely

Christine Cottrell

1180 Gould Rd

Grayland, WA 98547

P.S. On the water rights S2 129392
which is only the right to divert
water from the drainage ditch to
the sump hole, the sump hole is
mentioned but I haven't found
water rights for it.
